

Our people are our greatest strength

What we are looking for....

Senior PHP Developer (LAMP)

Why HockeyTech....

Hockey is more than just a sport. It's a way of life here in Canada. Here's your chance to bring your obsession for hockey and your passion for technology together.

HockeyTech is the world leader in providing hockey-related technologies, analytics and information services.

While HockeyTech is a new corporate identity, its brands have been providing cutting-edge solutions to the hockey world since 1998. At HockeyTech's core is its Hockey Information and Scouting System, which is the world's largest data repository on hockey player, team, and league information. Our client teams, leagues and organizations rely upon our cloud-based system to manage their vital player, prospect and game information in a secure environment.

Not to boast, but our client list includes all NHL & CHL teams, sport media firms including TSN, Hockey Canada, USA Hockey and Minor Pro teams to name a few. We're happy to report that the list keeps growing and we need to expand our team. That's where you get called off the bench and into this game.

Your position on the team:

- Review feature requests, participate in requirements gathering, and provide feedback during the development cycle.
- Produce brief functional overviews for review by co-workers and executive staff.
- Develop or update code within the HockeyTech suite of applications.
- Participate in documentation and delivery efforts.
- Participate in and lead, when needed, (technical) project meetings with the HockeyTech team and with clients.
- Provide high level support for project managers.

The experience you bring to the team:

- BSc in Computer Science, Computer Programming diploma, or equivalent.
- 4+ years of experience with LAMP
- Knowledge and understanding of Web Service technologies for integration purposes (SOAP and RESTful)

- Experience working with client side components (CSS, Javascript, AJAX)
- Familiarity with Agile project methodology and practices
- Experience with web security and exploit prevention (XSS, SQL Injection prevention, click jacking, etc).
- Knowledge of best practices for OOP
- Experience with software validation/testing practices

Bonus scores for:

- Intimate knowledge of DOM and the HTTP protocol
- Experience with mobile technologies (native and web)
- Knowledge of Angular JS
- Experience with a PHP framework (Zend, Mojavi, Symfony, CakePHP, etc)
- Knowledge of networking protocols (TCP/IP)
- Experience with technologies outside LAMP (.NET, Java, etc.)

We've got you covered...

Hockeytech offers an excellent work environment, competitive pay, and Company paid group benefits program, including other great incentives. We're committed to an inclusive, accessible work environment, where all employees feel valued, respected and supported.

To apply please send your complete resume to **careers@hockeytech.com**. Only applicants selected for an interview will be contacted.

We will happily provide accommodation for applicants with disabilities as part of our recruitment process. If you are contacted to arrange for an interview or testing, please advise us if you require accommodations.
