

## Why HockeyTech?

### ***Because Our People Are Our Greatest Strength!***

Everyone knows that Hockey is more than just a sport, and here in Canada it's a way of life. If you are looking to join the world leader in providing hockey-related technologies, analytics and information services, now is your chance to bring your obsession for hockey and your passion for technology together.

#### **What we are looking for.....**

We're looking for an extraordinary ***Network Administrator*** to assist in the maintenance, management and upgrades for our Linux stack while assisting with maintenance on our MS stack. At HockeyTech we have built a close-knit team of incredibly talented people passionate about building lasting value for our customers. We offer the world's deepest range of IT services for hockey organizations and are building new applications that will revolutionize the sport. We are structured to allow for great task variety (architect the network stack for a new application one day and work on scaling mobile APIs the next) and encourage creative thinking (got a great idea? Just ping the CTO and get it into our next sprint planning session).

Due to our strong track record of success, we have attracted a number of star clients over the years including all 30 NHL Teams, Hockey Canada, USA Hockey, and the Canadian Hockey League. We're happy to report that the list keeps growing. We need to expand our team and are looking for an exceptional individual to help us build on our success.

#### **Your position on the team.....**

- ✓ Help tune performance and ensure high availability of infrastructure
- ✓ Design and develop infrastructure monitoring and reporting tools
- ✓ Develop and maintain provisioning process and documentation

#### **In addition you will have.....**

- ✓ Experience with Linux servers in virtualized environments
- ✓ Familiarity with the fundamentals of Linux scripting languages
- ✓ Experience installing, configuring, and maintaining services such as Bind, Apache, MySQL, Nginx, etc.
- ✓ Strong grasp on configuration management tools, such as Vcenter, Puppet, Salt, or Cobbler
- ✓ Familiarity with load balancing, firewalls, switches, etc.
- ✓ Proficient with network tools such as MRTG, Wireshark, Nmap, or ZipTie

**Bonus scores for.....**

- ✓ Network management certification(s).
- ✓ Understanding of server profiling methods.
- ✓ Experience with automated testing.
- ✓ Experience working with a fast growing company
- ✓ A love for sports in general and Hockey in particular (you had to see that coming)

**We've got you covered.....**

HockeyTech offers an excellent work environment, competitive pay, and Company paid group benefits program, including other great incentives. We're committed to an inclusive, accessible work environment, where all employees feel valued, respected and supported.

To apply please send your complete resume to [careers@hockeytech.com](mailto:careers@hockeytech.com)

Only applicants selected for an interview will be contacted.

We will happily provide accommodation for applicants with disabilities as part of our recruitment process. If you are contacted to arrange for an interview or testing, please advise us if you require additional accommodation.
