Why Hockeytech?

Because Our People Are Our Greatest Strength!

Everyone knows that Hockey is more than just a sport, it's a way of life. If you are looking to join the world leader in providing hockey-related technologies, analytics and information services, now is your chance to bring your obsession for hockey and your passion for technology together.

What we are looking for…………

We're looking for an extraordinary Web Application Developer. At HockeyTech we have built a close-knit team of incredibly talented people passionate about building lasting value for our customers. We offer the world's deepest range of IT services for hockey organizations and are building new applications that will revolutionize the sport. We are structured to allow for great task variety (architect an analytics algorithm one day and create a new API for a mobile app the next) and encourage creative thinking (got a great idea? Just ping the CTO and get it into our next sprint planning session) Due to our strong track record of success, we have attracted a number of star clients over the years including all 30 NHL Teams, Hockey Canada, USA Hockey, and the Canadian Hockey League. We're happy to report that the list keeps growing. We need to expand our team and are looking for an exceptional individual to help us build on our success.

We're looking for a team player with at least 3 to 5 years of application development experience to work across all of our service offerings creating great new applications and features, to improve existing features, and creating innovative new APIs for our massive data stores.

Here are just some of skills you need to possess…

- Several years of experience with object-oriented PHP.*
- A solid understanding of object-oriented concepts and experience employing them.
- Strong knowledge of common software engineering patterns.
- Experience with MVC frameworks, such as Laravel. *
- Strong skills with SQL, working with dozens of models and tables, subqueries, outer joins, analyzing query plans, performance tuning, proper selection of indices, and similar tasks.
- Experience with Git workflow. *
- Experience with Javascript: jQuery, AngularJS, Coffee Script, Sass, and/or Bootstrap.

Bonus scores for:

- Have built at least one mid to large sized project with Laravel.
- Experience building RESTful APIs.
- Experience with test driven development.
- Experience with deployHQ, PHPUnit, or PHPSpec.
- Experience working with a fast growing company
- A love for sports in general and Hockey in particular (you had to see that coming)

We've got you covered…..

Hockeytech offers an excellent work environment, competitive pay, and Company paid group benefits program, including other great incentives. We're committed to an inclusive, accessible work environment, where all employees feel valued, respected and supported.
To apply please send your complete resume to careers@hockeytech.com

Only applicants selected for an interview will be contacted.

We will happily provide accommodation for applicants with disabilities as part of its recruitment process. If you are contacted to arrange for an interview or testing, please advise us if you require additional accommodation.
